LoxaSperse™ improves on traditional water-based irrigation/nebulization solutions:

- Designed for the intranasal treatment of sinus problems, LoxaSperse is a powder base that is mixed with sterile water at the time of administration
- It helps deliver medicine directly to the site of action
- It's also more convenient than water-based solutions for patients because it's a powder with a longer shelf life – may help with compliance
- Used in conjunction with PCCA **XyliFos™**, it provides dissolution and dispersing synergy. XyliFos is the perfect excipient pairing for LoxaSperse.
